Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 21-22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Steinhauser et al. (US Patent No. 5786838 cited by Applicant).

Steinhauser et al. disclose a method comprising:

activating at least one thermal transfer element (writing instrument 30 in Fig. 1, the detail of it is at Col. 10, lines 22-45)) in response to a condition thereby causing a thermochromic material (writing surface 26 in Fig. 1; writing surface 44 in Fig. 2, the detail of it is at Col. 7, lines 1-20) in close proximity to the at least one thermal transfer element to experience a color variation if a temperature at the thermochromic material varies from an ambient temperature by a selected temperature difference (see Col. 7, line 47 to Col. 8, line 15)); and

deactivating the at least one thermal transfer element in response to a second condition (the writing instrument 56 depicted in Fig. 5 is thermally controlled to predetermined temperature. See Col 10, lines 22-58).

As to claim 22, Steinhauser et al teach the limitation “the activating of at least one thermal transfer element comprises supplying current to the at least one thermal transfer

Art Unit: 2861

element” in that the cooling tip 62 of the writing instrument 56 depicted in Fig. 5 is supplied with current from battery 66.

Allowable Subject Matter

3. Claims 1, 3-20 are allowed.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection as applied to newly added claims 21-22 presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
